# PRODUCT DATA AMW

## DESCRIPTION
AMW is a fungicidal wash; a solution of an approved biocide in water. HSE Approval No 4246.

## RECOMMENDED USES
As a masonry surface fungicidal wash for professional use against mould, fungi, moss, etc.
Also suitable for treatment of similarly affected roof surfaces.

## TECHNICAL DATA
Appearance: Clear
Colour: Transparent
Solids Content: 0%
VOC-content: 0 grams per litre
Flashpoint: Not flammable

## Coverage
Theoretical: 5 $m^2$ per litre
Practical: Practical coverage depends on many factors such as porosity and roughness of the substrate and material losses during application.

## SURFACE PREPARATION
All mould, fungi, lichens etc. should be given a saturated coat of AMW before their complete removal (to kill spores).
Remove debris by power washing or use of a stiff brush. The whole area should then be given a second coat of AMW and allowed to dry (to render the substrate sterile).

## DIRECTION FOR USE
Apply AMW abundantly, preferably by brush, and wait 12 hours. Dry-brush and remove dust prior to painting, or clean with high-pressure water and let the surface dry.
Affected by heavy rainfall for at least 4 hours after application. If doubtful re-apply. Ensure residues are substantially diluted with water before entering drains etc.

## APPLICATION & THINNING
Tools: Brush or “coarse” spray such as a pneumatic garden spray. Do not dilute.

Cleanup: Water

## REMARKS
Protect material from frost.

## SAFETY
Consult Safety Data Sheet and Safety Information printed on the can.
Use biocides safely. Always read the label and product information before use.

## SHELLIFE / STORAGE CONDITIONS
5 years from date of production in unopened cans, if stored in dry, well ventilated areas, not in direct sunlight at temperatures between 5° and 35°C.
