

The Resin Flooring Association

TYPE 7: HEAVY DUTY FLOWABLE FLOORING

Feature	Typical Characteristics
Description	aggregate filled system having a self-smoothing surface, or may be given a light surface dressing
Typical thickness	4 – 6 mm
Typical resin types	polyurethane, epoxy or methacrylate
Intended use	Heavy to Very Heavy duty Clean areas with mechanical loading
Anticipated life*	HD: 8 to 10 years VHD: 5 to 8 years
Application method	trowel or pin rake, with spiked roller
Loading	Excellent impact resistance
Chemicals	Very good resistance to chemical attack
Service temperature	-10°C to 60°C:
Colour	uniform single colour or decorative effect
U-V exposure	Grades available
Appearance	very smooth gloss or matt finish
Osmosis	May occur
Cleaning methods	Scrubber dryer
Hygiene / cleanability	Excellent cleanability
Suitability for food processing areas	Non-tainting grades available
Slip resistance in wet conditions	High slip potential: may be reduced with matt or silk grades or with a light surface scatter
Anti-static	Grades available

** actual life will depend on product thickness, quality of the substrate and service conditions

- LD (Light duty) light foot traffic, occasional rubber tyred vehicles
- MD (Medium duty)regular foot traffic, frequent fork lift truck traffic, occasional hard plastic-wheeled trolleys,HD (Heavy duty)constant fork lift truck traffic, hard plastic wheeled trolleys, some impactVHD (Very heavy duty)severe heavily loaded traffic and impact
