Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 2016/918

SAFETY DATA SHEET

Aqualife WSE Primer Activator

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| or |
|----|
|    |
|    |
|    |
|    |

#### **1.2 Relevant identified uses of the substance or mixture and uses advised against**

| Identifie                            | d uses                                    |
|--------------------------------------|---|
| Industrial uses<br>Professional uses |   |
| Uses advised against                 | Reason                                    |
| Consumer use                         | Product is not intended for consumer use. |

#### 1.3 Details of the supplier of the safety data sheet

Tor Coatings Limited Portobello Industrial Estate Birtley County Durham United Kingdom DH3 2RE Telephone no.: +44 (0) 191 4106611 Fax no.: +44 (0) 191 4920125 enquiries@tor-coatings.com

e-mail address of person : rpmeurohas@ro-m.com responsible for this SDS

#### 1.4 Emergency telephone number

| <u>Supplier</u>    |                        |
|--------------------|------------------------|
| Telephone number   | : +44 (0) 207 858 1228 |
| Hours of operation | : 24/7                 |

### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Skin Corr. 1C, H314 Eye Dam. 1, H318 Skin Sens. 1, H317 Aquatic Chronic 3, H412

Date of issue/Date of revision

1/14

## **SECTION 2: Hazards identification**

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

**Hazard pictograms** 

| Signal word   | :  | Danger  |
|---|----|---|
| Hazard statements   | :  | Causes severe skin burns and eye damage.<br>May cause an allergic skin reaction.<br>Harmful to aquatic life with long lasting effects.  |
| Precautionary statements  |    |   |
| General   | :  | Not applicable.   |
| Prevention  | :  | P280 - Wear protective gloves and eye protection: gloves : polyvinyl chloride (PVC) -<br>Safety glasses with side shields.<br>P273 - Avoid release to the environment.  |
| Response  | :  | <ul> <li>P301 - IF SWALLOWED:</li> <li>P330 - Rinse mouth.</li> <li>P331 - Do NOT induce vomiting.</li> <li>P305 - IF IN EYES:</li> <li>P351 - Rinse cautiously with water for several minutes.</li> <li>P338 - Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P302 - IF ON SKIN:</li> <li>P352 - Wash with plenty of soap and water.</li> <li>P310 - Immediately call a doctor.</li> </ul> |
| Storage   | :  | P405 - Store locked up.   |
| Disposal  | 1  | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Hazardous ingredients   | 1  | Poly[oxy(methyl-1,2-ethanediyl)], $\alpha$ -(2-aminomethylethyl)- $\omega$ -(2-aminomethylethoxy)-and tetraethylenepentamine  |
| Supplemental label elements   | 1  | Not applicable.   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | :  | Not applicable.   |
| Special packaging requirem  | en | <u>ts</u>   |
| Containers to be fitted<br>with child-resistant<br>fastenings   | :  | Not applicable.   |
| Tactile warning of danger   | 1  | Not applicable.   |
| 2.3 Other hazards   |    |   |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | :  | This mixture does not contain any substances that are assessed to be a PBT or a vPvB.   |
| Date of issue/Date of revision  |    | : 18/03/2019 Date of previous issue : 18/03/2019 Version : 4 2/14   |

### **SECTION 2: Hazards identification**

Other hazards which do : None known.

not result in classification

## **SECTION 3: Composition/information on ingredients**

3.2 Mixtures

### : Mixture

|  |   |    | Classification  |      |
|--|---|----|---|------|
| Product/ingredient<br>name   | Identifiers   | %  | Regulation (EC) No. 1272/2008 [CLP]   | Туре |
| Poly[oxy(methyl-1,2-ethanediyl)],<br>α-<br>(2-aminomethylethyl)-ω-(2-aminomethylethoxy)- | EC: -<br>CAS: 9046-10-0                               | ≤5 | Skin Corr. 1C, H314<br>Eye Dam. 1, H318<br>Asp. Tox. 1, H304<br>Aguatic Chronic 3, H412   | [1]  |
| tetraethylenepentamine   | EC: 203-986-2<br>CAS: 112-57-2<br>Index: 612-060-00-0 | ≤5 | Acute Tox. 4, H302<br>Acute Tox. 4, H312<br>Skin Corr. 1B, H314<br>Eye Dam. 1, H318<br>Skin Sens. 1, H317<br>Aquatic Chronic 2, H411<br>See Section 16 for the full text of the<br>H statements declared above. | [1]  |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

#### Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

[6] Additional disclosure due to company policy

Occupational exposure limits, if available, are listed in Section 8.

### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| General                    | : In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and seek medical advice.   |
|----------------------------|---|
| Eye contact                | <ul> <li>Check for and remove any contact lenses. Immediately flush eyes with running<br/>water for at least 15 minutes, keeping eyelids open. Seek immediate medical<br/>attention.</li> </ul>   |
| Inhalation                 | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br>trained personnel.  |
| Skin contact               | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>  |
| Ingestion                  | : If swallowed, seek medical advice immediately and show the container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### 4.2 Most important symptoms and effects, both acute and delayed

| Date of issue/Date of revision         : 18/03/2019         Date of previous issue         : 18/03/2019         Version         : 4 |
|---|
|---|

### **SECTION 4: First aid measures**

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in nonallergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Contains tetraethylenepentamine. May produce an allergic reaction.

#### Over-exposure signs/symptoms

| Eye contact                | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness                           |
|----------------------------|--|
| Inhalation                 | : No specific data.  |
| Skin contact               | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur |
| Ingestion                  | : Adverse symptoms may include the following: stomach pains  |
| 4.3 Indication of any imme | diate medical attention and special treatment needed   |
| Martine to allow to take   |  |

| Notes to physician  | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours. |
|---------------------|--|
| Specific treatments | : No specific treatment.   |

See toxicological information (Section 11)

### SECTION 5: Firefighting measures

| 5.1 Extinguishing media  |  |
|--|--|
| Suitable extinguishing media   | : Recommended: alcohol-resistant foam, CO <sub>2</sub> , powders, water spray.   |
| Unsuitable extinguishing media   | : Do not use water jet.  |
| 5.2 Special hazards arising  | from the substance or mixture  |
| Hazards from the substance or mixture  | : In a fire or if heated, a pressure increase will occur and the container may burst.<br>This material is harmful to aquatic life with long lasting effects. Fire water<br>contaminated with this material must be contained and prevented from being<br>discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products                                       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides  |
| 5.3 Advice for firefighters<br>Special protective actions<br>for fire-fighters | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident if<br/>there is a fire. No action shall be taken involving any personal risk or without<br/>suitable training.</li> </ul>  |

### **SECTION 5: Firefighting measures**

| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |
|---|---|
| Additional information                            | : No unusual hazard if involved in a fire.  |

### **SECTION 6: Accidental release measures**

6.1 Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Do not breathe vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|---|--|
| For emergency responders       | : | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
|                                |   | Avoid dispersed of anily material and what found as that with anily water who a drains   |

6.2 Environmental precautions
 Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.

#### 6.3 Methods and material for containment and cleaning up

| Small spill                     | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|---------------------------------|---|
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spill product. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information  |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance.

| 7.1 Precautions for safe handling | <ul> <li>Keep away from heat, sparks and flame. No sparking tools should be used.<br/>Avoid contact with skin and eyes. Avoid the inhalation of dust, particulates, spray or<br/>mist arising from the application of this mixture. Avoid inhalation of dust from<br/>sanding.</li> <li>Eating, drinking and smoking should be prohibited in areas where this material is<br/>handled, stored and processed.</li> <li>Put on appropriate personal protective equipment (see Section 8).</li> <li>Never use pressure to empty. Container is not a pressure vessel.</li> <li>Always keep in containers made from the same material as the original one.</li> <li>Comply with the health and safety at work laws.</li> <li>Do not allow to enter drains or watercourses</li> </ul> |
|-----------------------------------|---|
|                                   | Never use pressure to empty. Container is not a pressure vessel.<br>Always keep in containers made from the same material as the original one.  |

#### 7.2 Conditions for safe storage, including any incompatibilities

| Date of issue/Date of revision | : 18/03/2019 | Date of previous issue | :18/03/2019 | Version | :4 | 5/14 |
|--------------------------------|--------------|------------------------|-------------|---------|----|------|
|--------------------------------|--------------|------------------------|-------------|---------|----|------|

## **SECTION 7: Handling and storage**

Store in accordance with local regulations.

#### Notes on joint storage

Keep away from: oxidising agents, strong alkalis, strong acids.

#### Additional information on storage conditions

Observe label precautions. Store in a dry, cool and well-ventilated area. Keep away from heat and direct sunlight. Keep away from sources of ignition. No smoking. Prevent unauthorised access. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

#### 7.3 Specific end use(s)

Recommendations

Not available.Not available.

Industrial sector specific solutions

### **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

#### **Occupational exposure limits**

No exposure limit value known.

**Recommended monitoring procedures** If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

No DNELs/DMELs available.

#### **PNECs**

No PNECs available

#### 8.2 Exposure controls

| Appropriate engineering controls | : Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapours below the OEL, suitable respiratory protection must be worn. |
|----------------------------------|--|
|                                  |  |

#### Individual protection measures

| Hygiene measures | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |
|------------------|---|
|                  | showers are close to the workstation location.  |

### **SECTION 8: Exposure controls/personal protection**

| Eye/face protection | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation bazards exist, a full-face respirator may be |
|---------------------|--|
|                     | goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead. Recommended: safety glasses with side-shields. (EN 166)   |

#### **Skin protection**

#### Hand protection

There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.

The breakthrough time must be greater than the end use time of the product.

The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.

Gloves should be replaced regularly and if there is any sign of damage to the glove material.

Always ensure that gloves are free from defects and that they are stored and used correctly.

The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.

Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.

| Gloves                          | : For prolonged or repeated handling, use the following type of gloves:   |
|---------------------------------|---|
|                                 | Recommended: polyvinyl chloride (PVC)<br>The recommendation for the type or types of glove to use when handling this<br>product is based on information from the following source:<br>EN 374  |
|                                 | The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.   |
| Body protection                 | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Recommended: Wear overalls or long sleeved shirt. (EN 467)  |
| Other skin protection           | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection          | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended: organic vapour (Type A) and particulate filter (EN 140) |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.                 |

### **SECTION 9: Physical and chemical properties**

| 9.1 Information on basic physical and chemical properties |                  |  |  |  |
|---|------------------|--|--|--|
| Appearance  |                  |  |  |  |
| Physical state  | : Liquid.        |  |  |  |
| Colour  | : Not available. |  |  |  |
| Odour   | : Not available. |  |  |  |
| Odour threshold   | : Not available. |  |  |  |
| рН  | : 10,5           |  |  |  |
| Melting point/freezing point                              | : Not available. |  |  |  |
| Initial boiling point and boiling range                   | : Not available. |  |  |  |

| Auto-ignition temperature                       | : Not available.   |
| Decomposition temperature                       | : Not available.   |
| Viscosity                                       | <ul> <li>Dynamic (room temperature): 1000 mPa⋅s<br/>Kinematic (40°C): &gt;0,205 cm²/s</li> </ul> |
| Explosive properties                            | : Not available.   |
| Oxidising properties                            | : Not available.   |

#### 9.2 Other information

No additional information.

# **SECTION 10: Stability and reactivity**

| 10.1 Reactivity                            | 1 | No specific test data related to reactivity available for this product or its ingredients.  |
|--|---|---|
| 10.2 Chemical stability                    | : | Stable under recommended storage and handling conditions (see Section 7).   |
| 10.3 Possibility of<br>hazardous reactions | : | Under normal conditions of storage and use, hazardous reactions will not occur.   |
| 10.4 Conditions to avoid                   | : | When exposed to high temperatures may produce hazardous decomposition products.   |
| 10.5 Incompatible materials                | : | Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.  |
| 10.6 Hazardous<br>decomposition products   | : | Under normal conditions of storage and use, hazardous decomposition products should not be produced. If involved in a fire, toxic gases including CO, CO2 and smoke can be generated. |

# **SECTION 11: Toxicological information**

### 11.1 Information on toxicological effects

#### Acute toxicity

| Product/ingredient name   | Result                 | Species    | Dose                    | Exposure |  |  |

## **SECTION 11: Toxicological information**

| Conclusion/Summary    | : Based on available data, the classification criteria are not met.   |
|-----------------------|---|
| General               | <ul> <li>Once sensitized, a severe allergic reaction may occur when subsequently exposed<br/>to very low levels.</li> </ul> |
| Carcinogenicity       | : No known significant effects or critical hazards.   |
| Mutagenicity          | : No known significant effects or critical hazards.   |
| Teratogenicity        | : No known significant effects or critical hazards.   |
| Developmental effects | : No known significant effects or critical hazards.   |
| Fertility effects     | : No known significant effects or critical hazards.   |

Other information : Not available.

## **SECTION 12: Ecological information**

#### 12.1 Toxicity

There are no data available on the mixture itself. Do not allow to enter drains or watercourses.

The mixture has been assessed following the summation method of the CLP Regulation (EC) No 1272/2008 and is classified for eco-toxicological properties accordingly. See Sections 2 and 3 for details.

| Product/ingredient name  | Result                                      | Species       | Exposure             |
|--|---|---------------|----------------------|
| Poly[oxy(methyl-1,2-ethanediyl)],<br>α-<br>(2-aminomethylethyl)-ω-(2-aminomethylethoxy)- |   | Daphnia spec. | 48 hours             |
|  | Acute IC50 135 mg/l<br>Acute LC50 >100 mg/l | Algae<br>Fish | 72 hours<br>96 hours |

**Conclusion/Summary** : Harmful to aquatic life with long lasting effects.

#### 12.2 Persistence and degradability

**Conclusion/Summary** : This product has not been tested for biodegradation. Based on available data, the classification criteria are not met.

#### 12.3 Bioaccumulative potential

| Product/ingredient name  | LogPow | BCF | Potential |
|--|--------|-----|-----------|
| Poly[oxy(methyl-1,2-ethanediyl)],<br>α-<br>(2-aminomethylethyl)-ω-(2-aminomethylethoxy)- |        | -   | low       |

| 12.4 Mobility in soil                     |                  |
|---|------------------|
| Soil/water partition<br>coefficient (Koc) | : Not available. |
| Mobility                                  | : Non-volatile.  |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

**12.6 Other adverse effects** : No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance.

#### 13.1 Waste treatment methods

| Product                 |   |  |
|-------------------------|---|--|
| Methods of disposal     | : | The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. |
| Hazardous waste         | : | Yes.   |
| Disposal considerations | : | Do not allow to enter drains or watercourses.<br>Dispose of according to all federal, state and local applicable regulations.<br>If this product is mixed with other wastes, the original waste product code may no<br>longer apply and the appropriate code should be assigned.<br>For further information, contact your local waste authority.   |

#### European waste catalogue (EWC)

The European Waste Catalogue classification of this product, when disposed of as waste, is:

| Waste code              | Waste designation   |  |  |
|-------------------------|---|--|--|
| 08 01 15*               | aqueous sludges containing paint or varnish containing organic solvents or other hazardous substances   |  |  |
| Packaging               |   |  |  |
| Methods of disposal     | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |  |  |
| Disposal considerations | <ul> <li>Using information provided in this safety data sheet, advice should be obtained from<br/>the relevant waste authority on the classification of empty containers.<br/>Empty containers must be scrapped or reconditioned.<br/>Dispose of containers contaminated by the product in accordance with local or<br/>national legal provisions.</li> </ul> |  |  |
| Special precautions     | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.                           |  |  |

#### Notice to reader

The information in this Safety Data Sheet is based on the present state of knowledge and current legislation. It provides guidance on health, safety and environmental aspects of the product and should not be construed as any guarantee of technical performance or suitability for particular applications. The product should not be used for purposes other than those shown in Section 1 without first referring to the supplier and obtaining written handling instructions. As the specific conditions of use of the product are outside the supplier's control, the user is responsible for ensuring that the requirements of relevant legislation are complied with. The information contained in this safety data sheet does not constitute the user's own assessment of workplace risks, as required by other health and safety legislation.
