

# **FIRE PROTECTION THAT CAN TAKE THE HEAT**

## **TORREX 3**

The complete solution for fire upgrading and fire retardant coatings for internal communal areas.

**MAKING  
BUILDINGS  
BETTER**

**TOR**

# HOW WE WORK WITH YOU

## 1 Free Survey

Our site surveys are FREE. Our first step is to listen, to learn and to collaborate. One of our highly experienced Area Business Managers will meet with you to discuss your project and undertake a free survey of your building, noting any issues and defects to ensure every aspect of the project is clearly understood and documented thoroughly.

## 2 Project Specification

Following your survey, your Area Business Manager will recommend professional contractors to complete your installation. A detailed, bespoke written project specification will then be issued including CAD drawings as required. This specification explains how every detail of the building will be tackled. While all Tor specifications are designed to be as easy to follow as possible, your Area Business Manager will always be on hand to answer any questions you might have.

## 3 Installation

Your Area Business Manager and our technical service team will be there to monitor the various stages of your installation and ensure the project specification is followed correctly. You can be safe in the knowledge that we partner only with contracting companies whose customer service principles and values are aligned with our own.

## 4 Aftercare

For added peace of mind, all of our systems are offered with a comprehensive range of no quibble warranties. We are also pleased to offer building owners our insurance-backed guarantee, TorGuard.

With over fifty years' experience, Tor Coatings is a market leader in the field of fire upgrading and fire retardant coatings for internal communal areas. We are renowned for our high performance coating systems and cutting edge products that include our Torrex series.

But we don't simply manufacture and market products; we provide clients with a complete service, where you will receive the highest level of technical support and backup right through to the delivery of the finished project. From site surveys and testing, to bespoke specifications and CAD models, we offer our clients complete peace of mind - all at no additional cost.

# TORREX 3

**The Torrex 3 fire upgrading coating system from Tor Coatings offers superior fire protection and safety in high-risk social housing areas.**

Specifically designed for interior communal spaces, stairwells, and fire escape routes, this advanced system provides unparalleled protection where it matters most.

Meeting Euroclass B requirements, the Torrex 3 system is engineered to hold back flames in a fire, giving residents time to evacuate safely and limiting building damage. Its robust formula ensures long-lasting performance, reducing the need for frequent maintenance and reapplications. The water-based formula aligns with sustainable building practices, minimising environmental impact.

Professional specifiers will appreciate the system's ease of application and versatility, adhering seamlessly to sound previously painted substrates. Available in eggshell and anti-graffiti finishes, Torrex 3 comes in a comprehensive range of colours, matching RAL, BS, and NCS standards upon request.

With over 50 years of social housing fire protection experience, trust Tor Coatings for ultimate in safety, sustainability, and performance.

## Our promise

Our experienced team will carry out a full risk assessment of your communal area and specify a system that performs to your exact requirements. That means we will never over-specify nor under-specify.

# FEATURES AND BENEFITS

## Field based specialists

We will carry out an assessment of your communal area and compile a specification of the performance your budget needs.

## Tried and tested

We have the most comprehensive range of fire protection coatings on the market allowing us to perfectly match your needs

## Proven Track Record

Established in 1975 and with over 50 years' experience in fire protective coating systems.

## Cost Effective

Our systems ensure that we can deliver the ultimate, cost-effective, high-performance solution.

## Engineered range

The system specified always matches the risk assessment on site.

## Global

Tor Coatings is part of one of the world's largest paint companies and therefore has the scale to deliver.

## Easily applied

All Torrex 3 systems can be applied in as little as three coats

## Multi-Surface Application

The Torrex 3 range can be used on a wide range of surfaces.

# PERFORMANCE YOU CAN DEPEND ON

**Tor Coatings Torrex 3 is designed to provide Euroclass B rated fire protection to walls and ceilings in communal areas assessed as having high spread of fire risk.**

Torrex 3 systems can be colour matched to your requirements and are suitable for a wide range of substrates. All systems are suitable for all communal areas and escape routes.

Once installed, we can continue to protect the surfaces and deliver the same level of protection on future decorations, maintaining the fire performance. This will deliver decades of managed fire performance for your building stock.

## **The specification process**

As no two sites are the same, our tried and tested 3 step specification process assesses the overall fire risk posed by existing substrates and site conditions to ensure the correct paint system is specified for each project.

### **1 Assess paint adhesion**

Our Specification Team perform on-site adhesion tests to assess the condition of the existing decorations and determine whether paint adhesion is good or bad.

### **2 Evaluate spread of fire risk**

We consider additional factors that influence system specification and determine the severity of the fire risk.

### **3 Select your system**

A Euroclass B fire rating can only be achieved by the correct application of Torrex 3 to the existing substrate and is dependent on its assessed risk level.

# THE SCALE TO DELIVER

Our nationwide team of Area Business Managers offer unrivalled expertise and knowledge supported by our dedicated customer services team, our team of experienced coatings chemists and our technical help desk.

To arrange your FREE site survey, please contact us either via our website at [www.tor-coatings.com](http://www.tor-coatings.com) or on the phone number below.
