IF YOU'VE GOT A BUILDING,
WE'VE GOT IT COVERED

TORREX[™]

REPAIR | REFURBISH | PROTECT | WATERPROOF

Torrex is designed to hold back the spread of flames in a fire, limiting damage to the building and giving residents the time to evacuate safely. The system allows users to upgrade the fire performance of existing coatings on walls and ceilings in communal spaces, stairwells and fire escapes in as little as 3 coats.

Torrex is the UK's most comprehensive range of Class 0 internal fire protection coatings. Trusted and proven in the field, Torrex is able to assure performance, quality, reliability and maximum protection in every project.

How we work with you

Free Survey

Our site surveys are FREE. Our first step is to listen, to learn and to collaborate. One of our highly experienced Area Business Managers will meet with you to discuss your project and undertake a free survey of your roof, noting any issues and defects to ensure every aspect of the project is clearly understood and documented thoroughly.

Project Specification

Following your survey, your Area Business Manager will recommend professional contractors to complete your installation. A detailed, bespoke written project specification will then be issued including CAD drawings as required. This specification explains how every detail of the roof will be tackled. While all Tor specifications are designed to be as easy to follow as possible, your Area Business Manager will always be on hand to answer any questions you might have.

Installation

Your Area Business Manager and our technical service team will be there to monitor the various stages of your installation and ensure the project specification is followed correctly. You can be safe in the knowledge that we partner only with contracting companies whose customer service principles and values are aligned with our own.

Aftercare

For added peace of mind, all of our systems are offered with a comprehensive range of no quibble warranties. We are also pleased to offer building owners our insurance-backed guarantee, TorGuard.

Torrex

The Tor Coatings Torrex series is designed to upgrade the fire performance of communal spaces, stairwells and fire escapes in as little as 2 coats.

Trusted by professionals and proven effective in the field, Torrex is able to assure performance, quality, reliability and durability in every project. The series offers three performance tiers to provide a cost-effective solution matched to the risk we identify for your individual project after a full site assessment. This risk-based approach delivers the most flexible, cost-effective means of complying with the RRO and meeting the required Class 0 fire rating.

Torrex can be specified in a range of colours and a selection of finishes with anti-graffiti (AG) options. We work with our clients at every stage of each project from initial fire risk assessment through to specification and installation, to help them meet their legal obligations under The Regulatory Reform (Fire Safety) Order 2005 (RRO) and The Building Regulations.

Features and benefits

Field Based Specialists

We will carry out an assessment of your communal area and compile a specification that performs to your exact level of requirements

Tried and Tested

We have the most comprehensive range of fire protection coatings on the market allowing us to perfectly match your needs

Proven Track Record

Tor Coatings has over 40 years' experience in protective coatings for balconies and communal areas, and high-performance waterproofing roofing systems

Cost Effective

Our 10 year systems ensures that we can deliver the ultimate, cost effective, high performance solution

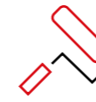

Engineered Range

With a comprehensive range of fire protection coating systems the system specified always matches the risk assessment on site

Global

We are part of one of the world's largest paint companies so have the scale to deliver

Easily Applied

All Torrex systems can be roller or spray applied in just a few coats

Multi-Surface Application

The Torrex range can be used on a wide range of surfaces

Our promise

When we carry out a risk assessment of your communal area we will only specify the system that performs to your exact level of requirements. That means we will never over-specify nor under-specify.

Performance you can depend on

Tor Coatings Torrex series offers 3 performance tiers, designed to provide Class 0 fire protection to walls and ceilings in communal areas assessed as having low, medium and high spread of fire risk.

Torrex can be colour matched to your requirements and is suitable for previously painted timber, metalwork, internal plaster and plasterboard, brick, masonry, concrete and ceramic tiles. All systems are suitable for all communal areas and escape routes. Once installed, we can continue to protect the surfaces and deliver Class 0 on future decorations with a range of low cost systems dedicated to maintaining the fire performance. This will deliver decades of managed fire performance for your building stock.

The specification process

As no two sites are the same, our tried and tested 3 step specification process assesses the overall fire risk posed by existing substrates and site conditions to ensure the correct paint system is specified for each project.

1. Assess paint adhesion

Our Specification Team perform on-site adhesion tests to assess the condition of the existing decorations and determine whether paint adhesion is good or bad.

2. Evaluate spread of fire risk

We consider additional factors that influence system specification in order to determine whether the fire risk is low, medium or high.

3. Select your system

A Class 0 fire rating can only be achieved by applying the correct Torrex system to the existing substrate and it's assessed risk level.

Levels of risk

High

Torrex Flameshield systems deliver Class 0 fire performance in areas defined as high risk*. It brings Class 0 to previously decorated surfaces, providing long term decorative protection. It is third party tested and trusted as the highest performance fire upgrading system available, giving specifiers complete peace of mind.

*Definitions of risk are contained in the Tor Fire Risk Calculator

Torrex™ TM Flameshield Eggshell

Torrex™ Flameshield AG

Medium

Torrex systems deliver Class 0 fire performance in areas defined as medium risk*, safeguarding against rapid spread of fire.

- All previous listed features, plus:
- 40+ year track record
- 3 coat system

Torrex™ AG

Torrex™ Gloss

Torrex™ Silk

Torrex™ Matt

Torrex™ Eggshell

Low

Torrex Flame Retardant systems deliver Class 0 fire performance in areas defined as low risk*.

- 2 coat formulation
- Easy to apply by brush or roller
- Smooth, plain colour finish

Torrex™ Flame Retardant AG

Torrex™ Flame Retardant Eggshell

Torrex™ Flame Retardant Matt
